

HEADWATERS GROUNDWATER CONSERVATION DISTRICT

Memo

To: All Permit Well Owners/Operators
From: Gene Williams, HGCD General Manager
CC: HGCD Board of Directors
Date: July 6, 2022
Re: **Initiate Stage 3 Severe Drought**

The HGCD Drought Index Levels are the average water level in 4 select Middle Trinity monitor wells. The District also considers the Palmer Drought Severity Index and the Guadalupe river flow rate at Kerrville.

Very hot dry conditions persist over Texas, very minimal rainfall has been recorded to date for 2022. Through July 6th, the Knipling-Bushland Laboratory in Kerrville has recorded 4.79 inches for the year. Aquifer levels throughout the county have taken a significant drop the last month moving our Drought Index Levels to Stage 3. As of today, the Palmer Drought Severity Index has most of Texas in Extreme Drought. The Guadalupe River discharge ft³/s is at 5.14

This Plan places the following restrictions on Permitted Wells.

1. Restrictions for Permitted Wells serving a Public Water System

The Plan requires a fractional reduction in water demand for the PWS under each stage. Headwaters GCD authority is at the well and not at the individual connection. It will be the responsibility of the PWS owner to implement drought restrictions.

Stage 1 Allowance	10% Reduction
Stage 2 Allowance	20% Reduction
Stage 3 Allowance	30% Reduction
Stage 4 Allowance	40% Reduction

2. Restrictions for Permitted Wells Being Used for Agricultural, Industrial or Other Purposes (non domestic).

The Plan requires the same percentage reduction as for Public Water Supply Systems.

Stage 1 Allowance	10% Reduction
Stage 2 Allowance	20% Reduction
Stage 3 Allowance	30% Reduction
Stage 4 Allowance	40% Reduction

3. **Drought Stages will be terminated at the discretion of the District when aquifer levels, rainfall, and river flow conditions return to more normal conditions.**

STAGE 3: SEVERE DROUGHT

- A. **Irrigation of landscaped areas including parks and golf courses should be limited to the previously designated watering hours between 8:00 PM and 10:00 AM. Watering should be by means of hand-held hoses, hand-held buckets, or drip irrigation only. The use of automatic sprinkler systems and hose-end sprinklers should be prohibited at all times. Athletic fields should abide by the same watering hours; however, they are allowed the use of irrigation systems for watering.**
- B. **The following use of water defined as non-essential should be prohibited:**
 1. **Washing down any sidewalks, walkways, driveways, parking lots, tennis courts, or other hard-surfaced areas.**
 2. **Washing down buildings or structures for purposes other than immediate fire protection.**
 3. **Failure to repair a controllable leak(s) within a reasonable period after having been given notice directing the repair of such a leak.**
 4. **Pumping of groundwater into ponds, lakes or reservoirs for the purpose of enhancing the appearance of the landscape.**
 5. **Washing any motor vehicle, motorbike, boat, trailer or other vehicle other than a public safety vehicle on a premises other than a commercial car wash or service station and not in the immediate interest of public health, safety, and welfare.**
 6. **The filling of swimming pools.**
